

WILLOW CREEK PAVING STONES

Bullnose Pavers

Weathered

Non-Weathered

Willow Creek Bullnose Pavers will put a classy finishing touch on any landscaping project. Bullnose pavers add a safe, rounded edge when used as stair treads and pool coping. Seat walls are more comfortable when capped with bullnose pavers, and they make an attractive cap on retaining walls and freestanding columns as well. And bullnose pavers provide a smooth perimeter when used as a soldier course around a raised paver patio.
